Walmir Neto

FULLSTACK WEB DEVELOPER

LATEST JOBS

ilove.me — Fullstack Software Developer

July 2022 - May 2023 📍 Lisbon

<u>ilove.me</u> is an ecosystem made for the beauty and aesthetics industry and my responsibilities here are to develop and maintain features including stocks, contracts, schedules, notifiers, etc..

ilove.me stack is a compound Ruby on Rails and PostgreSQL as main database. Ember.js in our frontend, Node.js and GoLang for some microservices. We use RabbitMQ to communicate between microservices. In Infrastructure we use Rancher management with Kubernetes and Okteto in our development environment

Repassa — Backend Software Developer

October 2021 - July 2022 📍 São Paulo

<u>Repassa</u> is the largest online thrift store in Brazil, my responsibilities here were to develop and maintain features including product stock, sign up of users, and receiving clothes bags.

Repassa stack is a compound API developed with Ruby on Rails and PostgreSQL as the main database (Using GraphQL to serve). On frontend is used by Next.js to consume GraphQL API. We use RabbitMQ to communicate between microservices. In Infrastructure we use Rancher management with Kubernetes

Interage ASH — Technical leader

October 2019 - September 2021 📍 Recife

<u>Interage</u> is a software house, which since 2012 has been delivering benefits to its customers through projects of the most varied sectors and sizes, my responsibilities here were to gather requirements for some projects with customers and/or P.O. and define together with the team how we would develop each feature

Interage ASH — Fullstack Software Developer

October 2017 - September 2019 📍 Recife

My responsibilities here were to maintain and develop new features for each customer's applications.

Stack: Ruby on Rails, PostgreSQL, Sidekiq, Redis, Node.js, React.js, Python, PHP, Heroku, Linode, EC2, S3
